Blockchain Use Cases in Government & Public Sector

Blockchain - Election

To properly run voting, accountable individuals need to ensure that the following components are available: accurate identity authentication, secure monitoring of votes, and trustworthy counterparts for estimating votes.

During elections, blockchain devices and platforms can serve as an underlying infrastructure for votes tracking and tallying. In this way, the governments may avoid the need to re-check and deter electoral fraud, such as fake voters and fraudulent votes.

Governments and voters would have checked record storage by tracking ballots on the blockchain, preventing human mistakes and voices corrupted by fake social practises.

Blockchain in Election (Examples)

Voatz, a platform that offers services for government elections, custom events, and convention voting, is a real-life example of blockchain-based organizations.

Votem is another provider of voting platforms serving private customers and government, public and military sector customers.

The experience of these businesses demonstrates that blockchain is effectively used for government and private purposes to hold secure, electronic elections.

Blockchain for Non-Business Entities

10 Ways Blockchain will Reinvent the Non-Profit Sector

Lower Administrative Costs

Facillitating Emergency Aid

Giving Chain Transparency

Cryptocurrency Donations

Auctioning Digital Collectibles

Goal-Driven Fundraising Models

Mining for Charity

Donor Anonymity

Cross-Border Donation

Philanthropist Control

Blockchain for Non-Business Entities (Examples)

- **Airbus** – Their heritage blockchain project gives charities a full-service blockchain platform that helps improve operational efficiency. Blockchain helps them lowering their administrative costs.

- **Bitgive** – Giving/donation tracking on the blockchain. It helps in giving their chain transparency.

- **CryptoKitties** – Auctioned 'Honu Kitty' to save the ocean. Blockchain helps them in auctioning digital collectibles.

- **Unicef Australia** – Created a page where people can mine for charity.

- **Cudo Donate** – People can download app and mine for charities.
